

The webinar is based on an informative guide developed by GIZ India (under its project Management of Organic Waste in India) for Ministry of Housing and Urban Affairs (MoHUA, Government of India). The guidebook talks about different and contextualised technique for management of biodegradable waste - including composting and anaerobic processing at household level. The guide encourages a “Do it Yourself” mindset in a fun and creative manner so as to bring an effective sustainable behavioural change for taking the accountability of one’s own waste.

Guidebook in English : [https://www.greentechknowledgehub.de/sites/default/files/2022-10/OWM at Home A Guidebook English.pdf](https://www.greentechknowledgehub.de/sites/default/files/2022-10/OWM%20at%20Home%20A%20Guidebook%20English.pdf)

Guidebook in Hindi : [https://www.greentechknowledgehub.de/sites/default/files/2022-10/OWM at Home A Guidebook Hindi.pdf](https://www.greentechknowledgehub.de/sites/default/files/2022-10/OWM%20at%20Home%20A%20Guidebook%20Hindi.pdf)

Interestingly the guidebook comes along with an interactive **decision making tool**, one of its kind tool developed keeping in mind the user at every home. It is in the form of an toolkit which helps the user in decision making – helping to choose a suitable biodegradable waste management technique based on various key parameters.
